AusChem Chemical Users Course

This 2 day course provides the training required by many Quality Assurance Programs, developing an awareness of our obligations to meet current legislation and accepted industry standards.

Course Codes:
AHCCHM303A Prepare and apply chemicals
AHCCHM304A Transport, handle and store chemicals

Update/Refresher Course

Delivering in 1 day the most up to date training that targets the latest changes in chemicals and safety use issues. Preparing users to correctly identify both current and upcoming.

Training in South Australia is delivered with Commonwealth Government funding and South Australian Government funding through The Department of Further Education, Employment, Science and Technology.
